

2019-2020

## Environmental Protection Technology

### Program Overview

Environmental protection technologists provide an important service to society by helping protect and sustain the long-term health of our ecosystems. This two-year diploma program will prepare students for technical work in the environmental sector. Students will gain the practical knowledge and skills needed to offer professional advice on a wide range of subjects, including: environmental impact assessment; hazardous and non-hazardous waste management; waste reduction and reuse strategies; air, soil, and water pollution prevention and monitoring; compliance auditing; and contaminated site investigation and remediation.

### Career Potential

Successful completion of the two-year program prepares graduates for employment at the technology level within consulting firms, government, and industry with excellent potential for upward mobility as job experience grows.

### Admission Requirements

- 65% in English Language Arts 30-1 or completion of English for Academic Purposes -Reading and Writing EAP II (ESLG1898) and English for Academic Purposes – Listening and Speaking EAP II (ESLG1899) with a minimum of 65%, or equivalent
